## CryoTreq®

CryoTreq® is the only hand-held, single use and stand-alone device for ophthalmic cryo-surgery, a treatment based on locally applying extreme freeze to eye tissues, to perform:

- Cryopexy for retinal detachment
- Treatment for retinopathy of prematurity

- Cataract extraction
- Cryo-destruction of lash follicles for trichiasis

**Qty:** 3/Bx  
**Brand:** Vitreq®

Description	SKU #
3 - Sterile devices per box, individually packed in a Tyvek peel pouch 1 - Multi-language Instructions for Use	CT00.D01

### Advantages

1

#### UNIQUE

- First and only disposable, hand-held stand-alone device for ophthalmic cryo-surgery

2

#### STRAIGHTFORWARD

- Already sterile, 6 simple steps to use it
- Stand-alone, just one button for frosting/defrosting
- Single use advantage
- Only one "REF" covers your needs for cryo-surgery

3

#### COMPELLING

- Lowers barriers to cryo-surgery
- 4 second activation to frost the cryo-tip
- Approximately 15 freezing cycles at one patient

# Addressing Control of Light Beam Direction

## 29G Spotlight Directional Chandelier

### Enabling Bimanual Surgery With:

- Directional control of light-beam for enhanced visualization
- 29G valved entry system for straightforward light fiber entrance, fixation and removal
- Stationary and wide field endo-illumination

29G Spotlight Directional Chandelier, Sterile	LF29.D02

# Improved Intraocular Surgical Control and Precision in Surgical Maneuvers

## Micro Forceps and Scissors

### Tip Design

- Shortened tip provides stronger grasping force<sup>1</sup>

### Shaft Design

- Rigid shaft reduces flexibility for better control
- 25% less flexible than competitors while maintaining 32 mm working shaft length<sup>1</sup>

### Ergonomically Designed Handle

- Synchronized handle squeeze closes the tip to facilitate precise grasping and cutting
- Round handle allows for easy tip alignment

# Micro Forceps

## Gauge Size with Color Coding

### Single-Use

All Single-Use Sold in 5/Bx

### Reusable

All Reusable Sold in 1/Bx

## Serrated Gripping

Serrated Gripping Micro Forceps are designed for grasping strong adherent PVR membranes.

Brand: Vitreq®

Description	SKU #
● 23G Single-Use	FC23.D02
● 25G Single-Use	FC25.D02
● 23G Reusable	FC23.R02
● 25G Reusable	FC25.R02

## ILM End-gripping

ILM end-gripping forceps have thin tips for ILM and ERM peeling. This improves visualization for grasping thin membranes.

Brand: Vitreq®

Description	SKU #
● 23G Single-Use	FC23.D03
● 25G Single-Use	FC25.D03

## Micro Forceps

### Eckardt Endgripping

Eckardt forceps with wider tip enhances surface grasping and reduces tearing effect. Shorter tip branches enhance grasping and holding power. Designed for ILM, ERM peeling and general peeling of the membranes which needs end-gripping action.

Brand: Vitreq®

Description	SKU #
● 23G Single-Use	FC23.D05

## Backflush Instruments

Atraumatic Aspiration and Brushing Procedures  
Thanks to Improved Intraocular Surgical Control

- Passive and active aspiration control in one instrument
- High volume backflush reservoir for increased capacity during vitreoretinal surgery
- Long shaft (33 mm) makes them suitable also for myopic eyes
- Blunt tip and silicone brush needles for atraumatic aspiration and brushing of retinal surface

## Disposable Backflush Instruments

Disposable backflush instruments are available in three different styles.

### Standard

Blunt or brush tip

23G Backflush Instruments Brush  
BF23.D02

Blunt tip

Brush tip

### Retractable

Silicone brush retracts into the instrument shaft for smooth and safe valved cannula entry

23G Retractable Brush  
BF23.D05

### Extendable

8 mm extendable silicone tip for draining fluid from behind retina and other standard backflush procedures

23G Backflush Instruments Extendable Silicone Tip  
BF23.D07

Disposable backflush instruments are shipped with cap and tubing for passive or active use during procedures. The direct connection between reservoir and needle allows no contact between hand piece and intraocular fluids.

## Cannulas and Needles

New disposable vitreoretinal cannulas and needles include innovative design features to optimize difficult surgical maneuvers. The products offer the VR surgeon optimal control over some of the most challenging VR procedures, to enhance their safety and success rate. For example, the range includes PFC needles that facilitate injection with minimized pressing force and have a central bore that enables a high volume of heavy liquids to enter the eye at a minimal velocity.

### PFC Injection Needles

New, optimized, PFC injection needle facilitates injection with minimized pressing force. The central bore permits a high volume of heavy liquid to enter the eye at a minimal velocity under controlled conditions.

## Squeezers

Unique pencil style injection device that affords surgeons precise control for injecting stains and perfluorocarbon liquids.

The 'Squeezer' gives surgeons perfect control for injecting stains and perfluorocarbon liquids using a single-handed technique. The Squeezer injection grip is the same as the familiar and safe pencil grip that is used in working with forceps, backflush- and other surgical instruments, as well as redundant syringe assisted injection with potential uncontrolled injection risks.

Using the Squeezer, surgeons can control the start and speed of injection, as well as the amount of liquid dispensed to avoid overfill and a jet stream effect. The surgeon can easily guide the needle of the Squeezer through the entry system, get close to the retina, and precisely stain only the target tissue with complete control over the injection speed.

The new Squeezer has been developed in collaboration with Prof. Claus Eckardt.

# BVI® is refocusing the future of vision.

As one of the fastest-growing, diversified surgical ophthalmic businesses in the world, our purpose-built portfolio spans more than 115 countries.

We've set our sights on touching the lives of millions of patients affected by conditions such as cataracts, refractive error, glaucoma, retinal disease, and dry eye.

Unburdened by legacy or bureaucracy, we have developed our strategy around a simple concept — taking pride in delivering innovative solutions for our physicians and patients, based on their needs.

We trust and empower our associates to make decisions and solve problems because collaboration drives us. Valuing agility, simplicity, and transparency, we stay committed to listening to our customers, delivering for our patients, and keeping the future in focus.
