

Global supply chain business process owner, CustomEyes
Location: Abingdon (UK) or Waltham, MA (US)

COMPANY OVERVIEW

BVI® is a global ophthalmic medical device manufacturer with a mission to deliver high quality solutions and innovation for advancing eye surgery and improving the vision of patients. With nine decades of developing leading products and solutions, BVI partners with ophthalmic surgeons to improve the vision of millions of patients across the globe. Our team supports surgical teams, in more than 115 countries worldwide, either directly or through our network of trusted distributors. Our trusted brands include: Beaver® (Knives and Blades), Visitec® (Cannulas), Malosa® (Single-Use Instruments), Vitreq® (Vitreoretinal Surgical Products) and PhysIOL® (Premium Intraocular Lenses).

PURPOSE

We are transforming “how we work” to enable us to become the fastest growing diversified surgical ophthalmic business centered on our customer needs. Improving our customer experience through the operational excellence and quality of our solutions and services will unlock higher growth and value for BVI. Our ambition requires an End-to-End approach and acceleration of process harmonization and adoption. The overall process flow, from forecasting to delivery provides a critical source of competitive advantage.

This value chain business owner will drive a faster and more consistent approach as well as orchestrate End to End an integrated Value Chain solution with speed, agility, quality and effective communication. Our goal is to exceed customer expectations by building a value chain that is responsive to fluctuating demands, personalization, smart distribution, and short lead time.

RESPONSIBILITIES

- Develop strategy and roadmap (Process, System, Data, Organization) to guide the End to End transformation of the CustomEyes Pack value chain.
- Defines and develops the process, system/IT and data, People/org. capabilities and solution to support the End to End value chain.
- Provides fact-based diagnosis and transparency in the value chain general performance, facilitating analytics supported decision making
- Defines clear business imperatives and value chain needs.
- Sets performance improvement targets together with functional leaders to achieve and improve internal/external benchmarks
- Orchestrates the transformation and implementation of harmonized business processes.
- Implement performance tracking. Oversee and monitor process execution and performance to exceed our customer expectations and business imperatives.
- Partners with other supply chain, customer service, material, manufacturing, product portfolio, quality and regulatory leaders to challenge current wisdoms as well as creating a common purpose and enthusiasm.
- Ensures strong End to End collaboration and alignment during the creation and implementation of the strategy. Drives adoption and performance with functional leaders.
- Helps solving systemic problems
- Balance between short term improvement and long-term value, ensuring the stakeholders and subject matter experts take responsibility for change and delivery of results quickly
- Uses operational excellence methods (Lean, 6sigma) to drive process optimization, problem solving and value improvement
- Drive efficiency and differentiation through IT system automation and integration (Custom software, Salesforce, IFS...)
- Drives innovations to build a value chain that is responsive to customer expectations including fluctuations of demand, personalization, smart distribution and short lead-time.
- Develops an effective internal and external communication program to support performance reporting transparency and promote continuous improvement innovations.

REQUIRED KNOWLEDGE, SKILLS AND ABILITIES

- Communicate effectively - develop and deliver multi-mode communications that convey a clear understanding of the unique needs across a global audience.
- Collaborate/Develop strong relationships – globally and cross functionally
- Drives results - consistently achieving results, even under tough circumstances.
- Manages complexity – making sense of complex, high quantity, and sometimes contradictory information to effectively solve problems.

MINIMUM REQUIRED EDUCATION AND EXPERIENCE

- Bachelor’s degree required
- Solid breadth of global planning, manufacturing and transportation
- Supply chain experience required
- Lean Six Sigma preferred
- Manufacturing/plant-based experience preferred

PHYSICAL REQUIREMENTS

- Extensive use of keyboard requiring repetitive motion of fingers.
- Extensive use of telephone and face-to-face communication requiring accurate perception of speech.
- Regular sitting for extended periods of time.
- Global travel is required
